

MOHAMMAD IMRAN KHAN

Data Analyst

○ +91-8889038390 ○ imrankhan.renowned@gmail.com ○ [LinkedIn](#) ○ [GitHub](#) ○ [Portfolio](#)

SUMMARY

Data Analyst with hands-on experience in data extraction, cleaning, and visualization using Python, SQL, Excel, and Power BI. Built end-to-end analytical solutions — from web-scraped NLP pipelines to interactive sales dashboards — that surface actionable insights for business stakeholders. Adept at translating messy, real-world data into clear decisions.

SKILLS

Programming: Python (Pandas, Numpy) SQL

Data Analysis & Visualization: Power BI, Tableau, Microsoft Excel (Pivot Tables, Power Query, XLOOKUP/VLOOKUP), Matplotlib, Seaborn

Business Intelligence: Data Cleaning, Data Wrangling, KPI Analysis, Dashboard Development, Data-Driven Decision Making

EXPERIENCE

Data Analyst Intern | Singularium Technologies | (WFH)

Dec 2025 – Apr 2026

Tools Used: Excel, Python, Data Extraction Tools

- Extracted and digitized data from 10,000+ PDFs and images — maintained 98%+ accuracy for ML model validation.
- Cleaned and standardized datasets in Excel, reducing data errors by ~30% and cutting model retraining cycles.
- Organized unstructured records into structured formats, improving data retrieval speed by ~40% for the engineering team.

PROJECTS

ReviewInsight AI | [Live Demo ↗](#) | Python · FastAPI · NLTK · TextBlob · Pandas · Scikit-learn · Next.js · Recharts

April 2026 – May 2026

- Web-scraped 14,000+ Google Maps reviews across restaurants and cafes; cleaned and preprocessed text for NLP pipeline.
- Classified reviews as Positive, Negative, or Neutral using NLTK VADER + TextBlob — ~85% consistency across both models.
- Used TF-IDF to extract complaint themes; surfaced slow service and staff behaviour as top issues for a real cafe client — owner actioned the findings.
- Built dashboards showing sentiment split, complaint frequency, and review trends for non-technical stakeholders.

Coffee Shop Sales Dashboard | SQL · Python (Pandas) · Power BI · Excel · DAX

Dec 2025 – Jan 2026

- Cleaned a 15,000+ row Kaggle dataset using SQL and Python — resolved missing values, duplicates, and inconsistencies across 6 months of sales data.
- Built 8 DAX measures in Power BI — tracked Total Sales, Orders, AOV, Peak Hours, and Product Performance.
- Identified top 3 revenue products and 2 underperforming time slots; recommended staffing and inventory optimizations.

Customer Churn Analysis | Python · Pandas · Matplotlib · Seaborn · Scikit-learn

Sep 2025 – Oct 2025

- Analysed 7,000+ customer records to identify churn patterns by tenure, contract type, and charges; built 10+ visualisations.
- Found 38%+ churn rate among monthly-contract users under 3 months tenure — recommended early engagement strategies.

AWARDS & CERTIFICATIONS

- **IBM Data Analyst Professional Certificate** – Completed hands-on training in Python, SQL, Excel, data visualization, and analytics.
- **Microsoft Career Essentials in Data Analysis** – Gained practical skills in Excel, SQL, data analysis, visualization, and reporting.
- **Accenture Data Analytics & Visualization Simulation** – Built Power BI dashboards and delivered data-driven business insights.

EDUCATION

Master of Computer Application (MCA) | • Specialisation: ML, Statistical Modelling, Database Systems | RGPV, Bhopal **2023 – 2025**

Bachelor of Computer Application (BCA) | • Coursework: SQL, Data Analytics, DBMS | BU, Bhopal

2020 – 2023

CORE COMPETENCIES

Analytical Thinking • Problem-Solving • Business Storytelling • Stakeholder Communication • Attention to Detail
